Technical Skills

- HTML5
- CSS3
- JavaScript
- jQuery
- Git
- CSS Frameworks / Bootstrap
- Responsive Design
- AJAX
- Node.js
- Express
- MySQL
- MongoDB
- React

Coding Experience

Budget Lite
Full Stack Developer

- Node, Express, MySQL, Sequelize, Google Auth, D3, & MVC Design Pattern
- This app requires login via Google Auth and provides a simple budget tracking app with tables and graphs. The user can add to or subtract from his/her budget via a modal form.

- GitHub Link - https://github.com/msgctcheng/Budget-Lite

Game Rally
Back End Developer

- Node, Express, React, MongoDB, Mongoose, Auth0, Cheerio, & Several APIs
- This app aggregated data from various gaming news and media sites/APIs to provide an organized source for all a person's video game information needs.
- Page Link – https://gamerally.herokuapp.com
- GitHub Link - https://github.com/msgctcheng/Video-Game-Media

MVC Burger App
Full Stack Developer

- Node, Express, Express-Handlebars, MySQL, and MVC Design Pattern
- This app lets users enter types of burgers, which are saved to a database then used to create a button. Pressing the button allows the user to "eat" the burger, changing the database entry.
- Page Link - https://pacific-scrubland-98219.herokuapp.com/
- GitHub Link - https://github.com/msgctcheng/burger

Marvel Character Aggregator

Full Stack Developer

- HTML5, CSS3, JavaScript, & jQuery/AJAX
- This app calls three API's including OMDB API, the Marvel API, and the Walmart API, and the front end was designed with Materialize CSS framework.
- Page Link - https://dreadsovereign.github.io/project1/
- GitHub Link - https://github.com/dreadsovereign/project1

Intentory/Retail App

Back End Developer

- Node & MySQL
- This App is a simple inventory app that uses a MySQL database to store product information, including quantity, and price. It simulates a customer transaction, and edits the inventory of items in database accordingly.
- GitHub Link - https://github.com/msgctcheng/bamazon_app

Train Scheduler

Full Stack Developer

- HTML5, CSS3, JavaScript, Moment.js, Materialize CSS, & Firebase.
- It allows people to add custom train schedules, dynamically populated, that persisted after reloading the page.
- Page Link - https://msgctcheng.github.io/train-schedule/
- GitHub Link - https://github.com/msgctcheng/train-schedule

Professional Licenses / Certifications

Legal Practice License – New York & New Jersey (2017)

Notary Public – North Carolina (2016)

Certified Full Stack Developer – UNC Chapel Hill (2017)

Work Experience

Upwork.com Freelancing *Front End Developer*	Fall 2017
